National Dairy Situation & Outlook – USDA Estimates

Milk Production and Cow Numbers

Monthly: Compared to 2002, USDA estimates that overall milk production across the U.S. was down -0.1% in June, led by Idaho's 6.1% growth in milk production (on 20,000 more cows and 60 more pounds per cow). California's estimated production was up 0.2% (on 46,000 more cows and 45 less pounds per cow). Among other western states, Arizona was up 2.4%; New Mexico up 4.8%; and Washington down 2.1%. Four of the top 10 states reported a decrease: New York, -2.7%; Minnesota -2.4%; Washington, -2.1%; and Pennsylvania -4.3%.

Quarterly: For the second quarter of 2003 compared to the first quarter of 2003, U.S. milk cow numbers were down 0.2% at 9.130 million, production per cow was up 2.3%; the net effect was a 2.1% increase in milk production to 43.8 billion pounds. USDA projects that for the third quarter of 2003 compared to the second quarter of 2003, U.S. milk cow numbers will decrease 40,000 cows to 9.090 million cows, production per cow will be down 4.4%; the net effect would be a 4.8% decrease in milk production to 41.7 billion pounds.

Milk Prices

Comparing the second quarter of 2003 to the first quarter of 2003, U.S. average milk prices were down \$0.30/cwt. to \$11.07/cwt. USDA projects that for the third quarter of 2003, U.S. average milk prices will be up \$0.85-1.25/cwt. compared to the second quarter; including a \$1.65-2.05/cwt. Class 4b price increase and a \$0.10-0.60/cwt. Class 4a price increase.

Utility Cow Prices

Comparing the second quarter of 2003 to the first quarter of 2003, average U.S. utility cow prices were up \$6.20/cwt. to a national average of \$46.52/cwt. USDA projects that utility cow prices will average \$45-47 in the third quarter of 2003.

Department Announces Hearing Decision

On June 4th, 2003, the Department held a public hearing to consider amendments to the Milk Stabilization and Marketing Plans for Market Milk (Stab Plans) and the Pooling Plan for Market Milk (Pool Plan). The amendments under consideration regarded changes to milk movement incentives, namely, transportation allowances and transportation credits. Having carefully weighed the contents of the hearing record, the Department has determined that the following changes are warranted:

- The transportation allowance rate for milk in the 0 to 89 mile bracket in the Southern California and San Diego Receiving Areas will be increased from \$0.00 to \$0.09 per hundredweight with no further changes to the remaining mileage brackets and rates.
- Extend transportation allowances to qualifying plants in Riverside County by including Riverside County in the Southern California Receiving Area.
- There will be no changes to the transportation allowances in Northern California.
- The transportation credits should be increased by \$0.10 for all eligible milk shipped to Southern California counties, with an additional \$0.08 increase (for a total of \$0.18) for shipments from the Southern San Joaquin Valley to Riverside and San Diego Counties.
- Make condensed skim eligible for transportation credits at the same level as bulk milk from all designated supply counties to their corresponding designated deficit counties.
- Except for the eligibility of condensed skim, there will be no other changes to transportation credits in Northern California.

Most of the adjustments to the Plans will take effect for milk delivered to processing plants on or after August 1, 2003. However, the transportation credits for condensed skim will take effect on November 1, 2003. Copies of the Hearing Determinations and a more detailed explanation of the Department's decision may be obtained by contacting the Dairy Marketing Branch at (916)

2003-2004 DAIRY COUNCIL ASSESSMENT RATES ESTABLISHED

The Dairy Council of California has recommended and the Department of Food and Agriculture has approved new assessment rates for the Council's 2003-2004 fiscal year (July 1, 2003, through June 30, 2004). The rates are presented below. The Dairy Council uses the funds generated from these assessments to carry out its mission of stimulating demand for milk by demonstrating the role of dairy products as essential elements in a healthy diet.

The Dairy Council Law mandates a two-tier assessment structure; an assessment for milk used in Class 1 milk products and a lower assessment for milk used in all other classes of milk products. A change in this assessment structure went into effect a few years ago based upon legislative changes to the Dairy Council Law and now specifies the Council's maximum allowable assessment rates for Class 1 milk shall not exceed two cents (\$.02) per hundredweight and the assessment for all other usages of milk shall not exceed eight mills (\$.008) per hundredweight. In addition, the relationship between the fees per hundredweight established for Class 1 milk versus milk for all other usages shall be at a ratio of 2.5 to 1. **The 2003-2004 Dairy Council assessment rates are applicable to both milk producers and milk handlers and are as follows:**

- The Class 1 milk assessment rate is one and fifty hundredths cents (**\$0.015**) per hundredweight.
- The assessment rate for all other usages of milk is sixty hundredths cents (**\$0.006**) per hundredweight.

Both of the above rates are the same as last year's assessment.

As in the past, handlers will continue to be responsible for remitting both the handler and producer assessments to the Department. Handlers shall pay the handler assessments for milk utilized in the plant of the handler. The producer assessments shall be collected by the first handler of milk produced in California by deducting any such assessments from any payment due the producer of such milk. Please call Steven Donaldson of the CDFA Marketing Branch at (916) 341-6005 if you have any questions about these assessment rates. If you have questions regarding the activities of the Dairy Council, please call Peggy Biltz, CEO of the Dairy Council, at (916) 263-3560.

** Formulas used the Federal Support Purchase Price

1/ The formulas, as of April 1, 2003, compare the calculated prices from the Chicago Mercantile Exchange (for butter and Cheddar cheese) or California weighted average price (for nonfat powder) to the federal support purchase prices for the three products. The higher value is selected for use in the pricing formulas. Federal Support Purchase Prices: Bulk Butter \$1.0500/per lb.; 40-lb. Block Cheddar Cheese \$1.1314/per lb.; Nonfat Dry Milk \$0.8000/per lb.

2/ All commodity prices are for the 26th of the prior month to the 25th of the current month.
When the Class 2 and 3 prices are issued every other month, the commodity reference prices are the same as those used for the calculation of that month's Class 4a and 4b prices.
